# BIRAJ PUDASAINI

**Backend Engineer | API Development & Integration | Go, Python, PHP, PostgreSQL**

Kathmandu, Nepal • +977-9840380475 • biraj2019pudasaini@gmail.com
www.birajpudasaini.com.np • github.com/mysterybee07

## PROFESSIONAL SUMMARY

Backend Engineer with about 3 years of experience in API development, system integration and programming with Go, Python/Django and PHP/Laravel. At Himalayan Vedic, designed and built the Go backends of **Nava Kundali (Mero Jyotish)** and its western version, **Himvega (Astroway)**, from scratch. Integrated national payment systems (ConnectIPS, Fonepay, eSewa, Khalti), real-time chat, video calls and push notifications. Experienced in debugging across API, database and client layers, Git workflows and transactional PostgreSQL design. Recognised by both employers for quick learning, dedication and end-to-end ownership. B.Sc. CSIT graduate.

## SKILLS

| | |
|---|---|
| **API Development** | REST APIs, WebSockets, microservices, JWT auth, role-based access control, API contracts |
| **Integration** | ConnectIPS, Fonepay, eSewa, Khalti, video calls, push notifications, PostHog, Cloudflare R2 |
| **Programming** | Go (Gin, Fiber), Python (Django, DRF), PHP (Laravel), SQL; basic TypeScript and Dart |
| **Databases** | PostgreSQL, MySQL; GORM, Django ORM, sqlc/pgx; indexing, transactions |
| **Frontend & Mobile** | React, Inertia.js, Tailwind CSS, Flutter; website and admin-panel features |
| **Testing & Debugging** | Postman API testing, Go race-detector tests, govulncheck, API and database debugging |
| **Git & DevOps** | Git/GitHub, code review, Docker, Jenkins, CI/CD, Linux VPS, Nginx, systemd, Jira |
| **Architecture** | Clean Architecture, MVC, repository pattern, service layer, dependency injection |
| **AI-Assisted Dev** | Claude Code, OpenAI Codex, free LLMs; code generation, review, debugging, testing, docs |
| **Soft Skills** | End-to-end ownership, quick learning, cross-team collaboration, code review, dependability |

## PROFESSIONAL EXPERIENCE

### Backend Engineer — May 2025 – Present
**Himalayan Vedic Pvt. Ltd.** — *Kathmandu, Nepal*

- Designed and built the Go backends of **Nava Kundali (Mero Jyotish)** and its western version **Himvega (Astroway)** from scratch.
- Own features end to end across Go backend APIs, the website and admin panel, and the Flutter mobile app.
- Integrated eSewa, Khalti, Fonepay, ConnectIPS and in-app purchases; built microservices, real-time chat, video calls and push notifications.
- Work with React and Flutter engineers on API contracts, integration issues and code reviews.
- Deploy and operate services on Linux VPS with Nginx reverse proxy, SSL, systemd and Git-based deployment.

### Backend Development Intern (Full-time) — Oct 2024 – May 2025
**Ideapreneur Nepal** — *Lalitpur, Nepal*
*Part-time contributor to company side projects* — *May 2025 – Present*

- Built and maintained REST APIs in Python (Django, Django REST Framework) and Go, backed by PostgreSQL.
- Contributed to the **Restaurant Management System**, **MoneyMitra** and **Creators Headquarters Nepal**.
- **Flaw Snap:** worked on the in-house platform for bug reporting, user-behaviour recording and analytics.

### PHP / Laravel Developer — Sep 2023 – Aug 2024
**CAB-Tech Software Development & Digital Marketing** — *Nepal*

- Delivered Library and Student Management Systems with CRUD modules, authentication, role-based access and validation using modular MVC patterns, Git and Jira.

## WORK PROJECTS

### Nava Kundali (Mero Jyotish) & Himvega (Astroway) | Himalayan Vedic — *navakundali.com*
Go, Gin, PostgreSQL, GORM, WebSocket, PostHog, Cloudflare R2, Flutter
*Astrology platform for consultations, pooja bookings and products; Himvega is its western version.*

- Designed and built both backends from scratch, including Himvega's astrologer onboarding, service discovery and appointment booking with explicit booking-status transitions and role-separated access.
- Built Go APIs for kundali, matchmaking, patro, rashifal, catalogue, cart, orders, consultations and pooja bookings.

- Built a WebSocket service for one-to-one consultation chat (goroutines, channels, broadcasting, connection lifecycle) and integrated third-party video calls: session start, token issuance and teardown.
- Integrated eSewa, Khalti, Fonepay, ConnectIPS and in-app purchases; built transactional coupon redemption and refunds with row-level locking, usage validation and coordinated token or stock adjustments.
- Integrated PostHog for user-behaviour analytics and Cloudflare R2 for object storage.
- Secured APIs with JWT and role-based access; improved data quality with duplicate-cleanup migrations, partial unique constraints, composite indexes and parameterized rating aggregates.

**Creators Headquarters** | **Ideapreneur Nepal** *creatorshqnepal.com*

Go (modular monolith), PostgreSQL, pgx, Atlas, Cloudflare R2, React, Vite, CI/CD

*Creator platform where creators find collaborators, brands and campaigns, and book podcast and video studios.*

- Set up the Go backend and the React admin panel (moved from Next.js to a Vite static build), with CI/CD workflows and idempotent VPS provisioning for deployment.
- Built admin features for studios and podcast rooms: resource types, Cloudflare R2 image storage, booking policies, entry passes, check-ins and member-code sequences.
- Built brand and campaign creation, subscription plans, the creator shop and home banners.
- Managed Atlas migrations and foreign keys; kept CI passing with race-detector tests and govulncheck.

**Restaurant Management System** | **Ideapreneur Nepal** *hms.ideapreneurnepal.com.np*

Python, Django, PostgreSQL

*Deployed multi-outlet restaurant operations system for owner, manager, waiter and kitchen-staff roles.*

- Built the order-to-kitchen workflow routing waiter orders to kitchen staff, and the billing workflow.
- Implemented role-based access for all four roles and sales reporting by item and category.
- Implemented recipe-based stock deduction with transactions, row-level locking and stock-movement records.

**MoneyMitra** | **Ideapreneur Nepal** *moneymitra.com*

Python, Django, Django REST Framework

*NEPSE investing platform (web and mobile): stock analytics, broker comparison, financial planning, calculators.*

- Contributed to Django and DRF REST APIs serving the platform's web and mobile apps.
- First production backend project: learned REST API design, Django models, ORM and database work.

## PERSONAL & ACADEMIC PROJECTS

**Procurement Management System** | **Personal Project** *github.com/mysterybee07/procurement*

PHP, Laravel 12, React, TypeScript, Inertia.js

- Built an end-to-end procurement system: requisitions and fulfilment, configurable multi-step approval workflows, Expression of Interest (EOI) publishing, vendor submissions, document management and EOI reports.
- Implemented automated vendor ranking from documents, pricing, completeness, delivery and past performance.
- Structured with repository interfaces, service layers and dependency injection; transactional approvals, email alerts.

**Exam & Result Distribution System** | **College Project** *github.com/mysterybee07/result-distribution*

Go, Fiber, GORM, MySQL, React, TypeScript, Docker Compose

- Built APIs for colleges, programs, courses, marks, exam routines and results, with JWT, bcrypt and bulk import.
- Automated exam-centre allocation using Haversine distance (within 50 km) and capacity-weighted selection, preventing a college from being its own centre or swapping centres with another college.
- Generated exam routines that skip weekends and enforce a 20-day gap between exams of the same program.

**SportsBee – Multi-Tenant Sports Venue Booking** | **Personal Project** *sportsbee.birajpudasaini.com.np*

Go, PostgreSQL, React

- Built a multi-tenant product end to end: venues, playable areas, sports, formats, bookings and matches, with venue-scoped operations and super-admin oversight.
- Implemented booking and rescheduling transactions with row-level locking, overlap checks and format-capacity validation, plus retry-safe payment completion under database locks.

## EDUCATION

**B.Sc. in Computer Science and Information Technology (CSIT)** **Graduated 2024**

*College of Applied Business, Kathmandu* ***Percentage: 73.24%***
